

TIME-TESTED QUALITY

FOUNDRY-MECHANICAL PLANT

The enterprise is equipped to the highest standards, including:

- **A foundry** capable of producing a wide range of castings in sand molds using the Harding Tar-Sand Process (HTS), with a weight of up to 5000 kg.
- **A metalworking shop**, featuring laser cutting, bending, welding, and CNC turning and milling operations.
- **A forging shop** with the capability to produce forgings and various stamped products.
- **State-of-the-art** laboratory equipment for chemical analysis and physical properties testing.

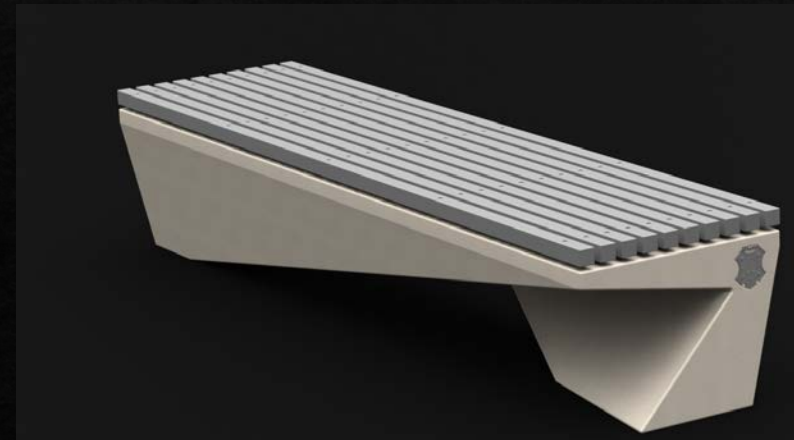

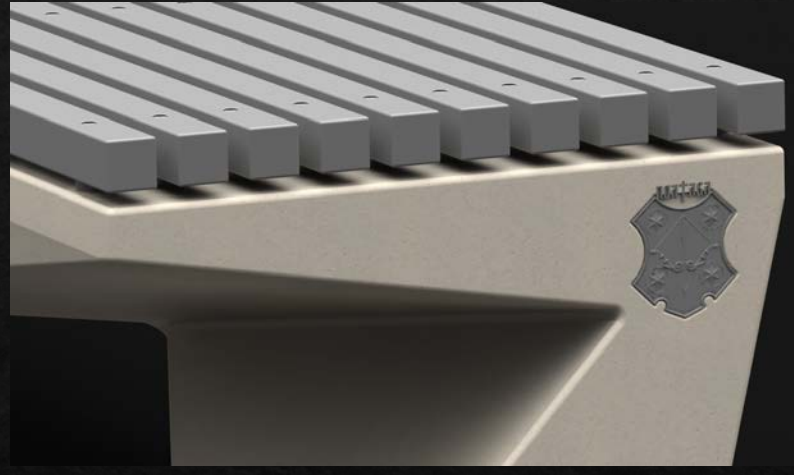

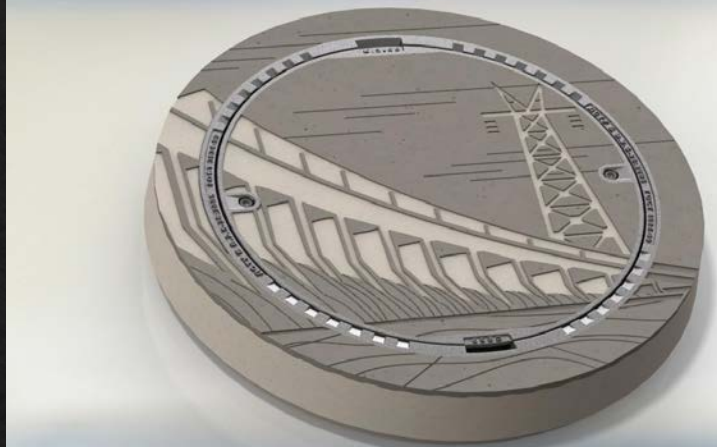

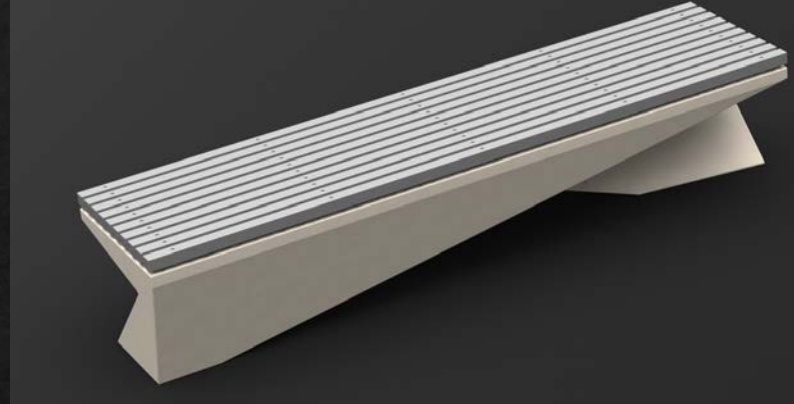

Decorative products for city parks and streets:

- **Cast iron benches**
- **Tree grates**
- **Manhole covers**
- **Stormwater drains**
- **Cast iron and forged fences**
- **Mooring bollards for port cities**

Individual engineering and design.

Full-cycle of engineering and manufacturing of machine-building components.

Work with us and you will get:

- High quality products
- Speed of work performance
- Competitive prices

Our advantages:

- We take into accounts to special requirement of customers;
- Individual approach to each client;
- Operational processing of orders regardless of volume and quantity;
- Flexible and proactive position in working with clients.
